TECHNICAL SKILLS

Languages: Java, SQL, TypeScript, JavaScript, HTML, CSS

Backend: Spring Boot, Spring Security, Spring Cloud Gateway, Spring MVC, Spring WebFlux, Node.js, Express.js

Frontend: Angular, React.js

Databases: PostgreSQL, MySQL, Oracle, MongoDB, Redis

Cloud & DevOps: Docker, Docker Compose, Nginx, AWS S3

Architecture & APIs: Microservices, RESTful APIs, Multi-Tenancy, JWT, RBAC, Flyway, OpenAPI

Testing & Tools: JUnit 5, K6, Postman, Git, GitHub

PROFESSIONAL SUMMARY

Full-Stack Developer with **2+ years of experience** building scalable REST APIs, microservices, and multi-tenant SaaS applications. Strong expertise in **Java, Spring Boot, Spring Security, PostgreSQL, and Spring Cloud**, with hands-on experience in Angular and React.js. Experienced in **JWT authentication, RBAC, Redis caching, Docker, Nginx, production VPS deployment, payment gateway integration, and AWS S3**.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Netferra, Hyderabad

Aug 2024 – Present

MPW — Multi-Tenant B2C SaaS E-commerce Platform

- Developed a **production-grade multi-tenant eCommerce SaaS platform** supporting multiple independent storefronts with isolated tenant data, custom branding, and product catalogs.
- Designed and implemented **5 Spring Boot microservices** covering Authentication, Product, Order, Tenant, and API Gateway functionality.
- Implemented **subdomain-based multi-tenancy** using Spring Cloud Gateway, Host header tenant resolution, and tenant context propagation across services with PostgreSQL data isolation.
- Built **JWT-based authentication and RBAC** using Spring Security, including Redis-backed token blacklisting and secure inter-service communication.
- Improved application reliability and performance using **Redis caching, idempotency, Resilience4j circuit breakers, Flyway migrations, and MapStruct**.
- Containerized and deployed the application to a **production VPS environment** using Docker, Docker Compose, PostgreSQL, Redis, and Nginx, including reverse proxy, domain routing, SSL, health checks, and production configuration.
- Integrated and documented REST APIs using **SpringDoc OpenAPI** and implemented centralized error handling for reliable service communication.

PROJECTS

Fashion Tee — Full-Stack E-commerce Platform

Jul 2025 – Oct 2025

[LIVE DEMO](#) | [REPO](#)

React.js, Node.js, Express.js, MongoDB Atlas, Cloudinary

- Built a responsive eCommerce platform using **React.js and Node.js**, achieving a 90+ Lighthouse performance score through lazy loading, route-based code splitting, and CDN-based image optimization.
- Developed REST APIs for **cart management, order processing, payment flow, authentication, and role-protected administration**.
- Implemented product and inventory management through an admin dashboard with role-based access control.

Online Job Portal

Jan 2025 – Mar 2025

[LIVE DEMO](#) | [REPO](#)

Java, JSP, Servlets, JDBC, Oracle SQL

- Developed a full-stack job portal supporting **candidate registration, resume profiles, job listings, and multi-step applications** using Java Servlets, JSP, and JDBC.
- Designed a normalized **Oracle SQL database** for users, jobs, applications, and employer profiles with indexed queries for efficient data retrieval.
- Applied **MVC, DAO, Service, and Controller architecture** to create a modular and maintainable application.

eCommerce Website with Admin Dashboard

2024

Java, MySQL, MVC

- Developed an eCommerce application with **product management, shopping cart, CRUD operations, and role-based admin authentication**.
- Implemented parameterized queries and prepared statements to prevent **SQL injection** and maintain database integrity.

EDUCATION

Bachelor of Technology — Electronics and Communication Engineering

Sep 2021 – Aug 2024

Kamala Institute of Technology and Science, Karimnagar (JNTUH) | CGPA: 6.45
